

COX CONNECTASSIST

ALLOW STUDENTS TO
**UP, UP, UPLOAD
AWAY!**

We know how important connectivity is, and that's why we're committed to closing the digital divide. **Cox ConnectAssist** will help make sure you're connected.

With upload speeds of 3Mbps, this option provides plenty of internet capacity for multiple people to work online simultaneously.

**3
MBPS**

In fact, multiple students under the same roof can participate in a virtual classroom setting, with additional upload capacity for regular internet activities to spare.

Cox ConnectAssist upload speeds allow students to:

1
Take photos of math homework (showing your work is key!) and upload it for grading

2
Use a digital platform like Google Meet or Microsoft Teams to collaborate with others on an important project.

3
Email large files that accompany a research paper or an important work project.

4
Upload a video to showcase your reading and conversational Spanish skills

Even when all these activities are going on, students can still do other things like browsing the internet for homework research, streaming music or just chatting with friends.
